

Sellen Safety Week 2018

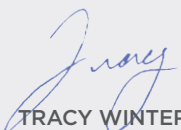

THE POWER OF SAFE CHOICES

MAY 7 - 11

Sellen's Annual Safety Week is back with a new theme for 2018: The Power of Safe Choices. This year, we are embracing this theme with the rest of the country as we celebrate national safety week on May 7-11.

No matter what your trade or title may be, the decisions you make each day, both large and small, impact your coworkers, your communities and your families. Every single person who steps foot on a Sellen job site is empowered to make safe choices and do things the right way each and every time.

To celebrate our work together, Sellen's leadership and safety teams will be visiting each of our job sites during Safety Week to say thank you for your continued commitment to safety.

TRACY WINTER
DIRECTOR OF SAFETY
